An error was made in one aspect of our interpretation of Table 2, which appears on the bottom page of 645 in the original article. While the data and statistics provided in Table 2 are correct, we stated:

Notably, both local and Indigenous forms of knowledge have increased in perceived value since the 2013 survey.

We should have stated:

Table 2 indicates no significant change in the value of Indigenous knowledge and a small decrease in value of local knowledge.

The original article has been corrected.
